1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 20-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fischer (718) in view of Jolidon (820) and Beretta (176).

Fischer discloses a method for locking a manual safety mechanism comprising:

- a) a cocked hammer; 6
- b) an engagable rotatable sear; and 13
- c) a manual safety for engaging the sear and preventing 28, 21; col. 2, lines 53-72 movement.

Fischer applies as recited above. However, undisclosed is a firearm that is a pistol.

Jolidon teaches a firearm that is a pistol (see fig. 3). Applicant is substituting one type of firearm for another in an analogous art setting as explicitly encouraged by the secondary reference (see col. 1, lines 1-14 of Jolidon). Also, undisclosed is a threaded locking pin with associated key to engage and lock the manual safety. Beretta teaches a threaded locking pin with associated key to engage and lock the manual safety (11, 17, 15, 18, 13, 14, 19). Note that the threaded locking pin of Beretta does not give any specifics with regard to the operation of the manual safety lever 11 and as such must be intended to be used with any manual safety in this art. This is considered to be explicit motivation to combine in the firearm art. It would have been obvious to a person of ordinary skill in this art at the time of the invention to apply the teachings of Jolidon and Beretta

to the Fischer firearm and have a firearm that is a pistol with a particular means or method for locking the manual safety in the locked position.

3. Claims 4-11 and 13-19 are allowed.

4. Applicant's arguments with respect to claims 20-22 have been considered but are moot in view of the new ground(s) of rejection.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
